

## TRUTEK TSA – SHIELD ANCHOR

**Applications:**

- fastening of tubing, ventilation, electrical and telecommunication installations
- fastening and securing of scaffolding and falsework
- fastening of suspended ceilings and lighting
- optional installation of threaded bars

**Advantages:**

- all-purpose anchor for solid base material and hollow-core slabs
- can be used in cracked and non-cracked concrete
- anchoring in hollow-core slabs of min C20/25 grade concrete
- R120 fire resistance
- simple installation requiring no special tools
- high anchorage safety in low-quality cavity base materials and hollow-core slabs as building blocks and precast concrete floors of such types as FERT, TERIVA, ACKERMAN, COBIAX

TSA anchor designation

| Trutek Shield Anchor | Thread size d [mm] | Max. thickness of fixed element [mm] | Anchor version                |
|----------------------|--------------------|--------------------------------------|-------------------------------|
| TSA                  | 12                 | -                                    | - internally threaded version |

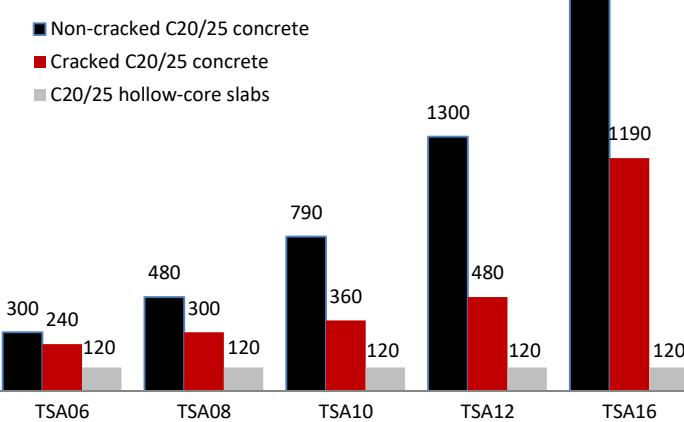

**Anchor bar material:**

TSA expansion anchor sleeves and threaded rods with eyelet or hook are made of regular carbon steel of the mechanical property class 5.8 acc. to PN-EN ISO898-1:2001 and their bolts are made of min 4.8 class to the same standard. Zinc coating up to 5µm acc. to PN-EN ISO 4042:2001/Ap1:2004

**Base material:**

Non-cracked and cracked concrete from C20/25 to C50/60 concrete acc. to PN-EN 206:2014 and hollow-core slabs of non-cracked concrete from C20/25 to C50/60 concrete acc. to PN-EN 206:2014

Calculated tensile strengths for different base materials (in KG)

**Technical specification of TSA anchors**

| Product code | Thread size | Hole diameter       | Min. hole depth     | Effective embedment depth | Min. base material thickness | Max. thickness of the fixed element | Min. hole diameter in fixed element | Anchor length |
|--------------|-------------|---------------------|---------------------|---------------------------|------------------------------|-------------------------------------|-------------------------------------|---------------|
|              | d [mm]      | d <sub>0</sub> [mm] | h <sub>1</sub> [mm] | h <sub>ef</sub> [mm]      | h <sub>min</sub> [mm]        | t <sub>fix</sub> [mm]               | d <sub>f</sub> [mm]                 | L [mm]        |
| TSA06        | 6           | 12                  | 50                  | 35                        | 70                           | -                                   | 6,5                                 | 45            |
| TSA08        | 8           | 14                  | 55                  | 40                        | 80                           | -                                   | 9                                   | 50            |
| TSA10        | 10          | 16                  | 65                  | 50                        | 100                          | -                                   | 11                                  | 60            |
| TSA12        | 12          | 20                  | 85                  | 60                        | 120                          | -                                   | 13                                  | 75            |
| TSA16        | 16          | 25                  | 125                 | 95                        | 190                          | -                                   | 17                                  | 115           |

**Calculated load capacity of TSA anchors**

| Anchor size symbol   | TSA06 | TSA08 | TSA10 | TSA12 | TSA16 |
|--|-------|-------|-------|-------|-------|
| Effective embedment depth  | 35    | 40    | 50    | 60    | 95    |
| Tensile capacity N <sub>Rd</sub> [kN] – non-cracked C20/25 concrete      | 3,0   | 4,8   | 7,9   | 13,9  | 23,8  |
| Tensile capacity N <sub>Rd</sub> [kN] – cracked C20/25 concrete          | 2,4   | 3,0   | 3,6   | 4,8   | 11,9  |
| Tensile capacity N <sub>Rd</sub> [kN] – C20/25 concrete hollow-core slab | 1,2   | 1,2   | 1,2   | 1,2   | 1,2   |
| Shear capacity V <sub>Rd</sub> [kN] – non-cracked C20/25 concrete        | 2,4   | 3,8   | 6,3   | 11,1  | 19,0  |
| Shear capacity V <sub>Rd</sub> [kN] – cracked C20/25 concrete            | 1,9   | 2,4   | 2,8   | 3,8   | 9,5   |
| Shear capacity V <sub>Rd</sub> [kN] – C20/25 concrete hollow-core slab   | 0,9   | 0,9   | 0,9   | 0,9   | 0,9   |
| Anchor spacing S <sub>cr,N</sub> [mm]                                    | 105   | 120   | 150   | 180   | 285   |
| Edge distance C <sub>cr,N</sub> [mm]                                     | 70    | 80    | 100   | 120   | 190   |
| Required tightening torque   | 6     | 14    | 27    | 46    | 110   |

When designing, the entire technical approval AT-15-7851 / 2015 should be taken into account

**Calculated load capacity of TSA anchors in non-cracked concrete at any load direction in case of fire**

| Anchor size symbol                                 | TSA06 | TSA08 | TSA10 | TSA12 |
|--|-------|-------|-------|-------|
| Effective embedment depth                          | 35    | 40    | 50    | 60    |
| Calculated load capacity R30 N <sub>Rd</sub> [kN]  | 0,1   | 0,4   | 0,9   | 1,7   |
| Calculated load capacity R60 N <sub>Rd</sub> [kN]  | 0,1   | 0,3   | 0,8   | 1,3   |
| Calculated load capacity R90 N <sub>Rd</sub> [kN]  | 0,1   | 0,3   | 0,6   | 1,1   |
| Calculated load capacity R120 N <sub>Rd</sub> [kN] | 0,1   | 0,2   | 0,5   | 0,8   |

## Calculated load capacity of TSA anchors in cracked concrete at any load direction in case of fire

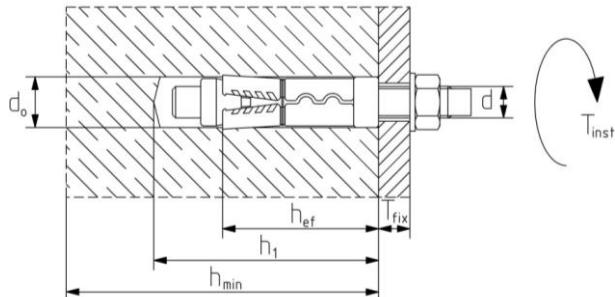

| Anchor size symbol                                 | TSA06 | TSA08 | TSA10 | TSA12 |
|--|-------|-------|-------|-------|
| Effective embedment depth                          | 35    | 40    | 50    | 60    |
| Calculated load capacity R30 N <sub>Rd</sub> [kN]  | 0,1   | 0,4   | 0,9   | 1,7   |
| Calculated load capacity R60 N <sub>Rd</sub> [kN]  | 0,1   | 0,3   | 0,8   | 1,3   |
| Calculated load capacity R90 N <sub>Rd</sub> [kN]  | 0,1   | 0,3   | 0,6   | 1,1   |
| Calculated load capacity R120 N <sub>Rd</sub> [kN] | 0,1   | 0,2   | 0,5   | 0,8   |

## Calculated load capacity of TSA anchors in hollow-core slabs at any load direction in case of fire
